

VisioApps

Founder & CEO: Prमित Bhargava

Unit No 212, ILD Trade Centre
Sohna Road, Sector 47,
Gurugram – 122018

hello@visio-apps.com

They are a tech startup established in 2018 in India, building the next generation accessibility apps. [Visioapps](#) try to understand the needs of visually impaired people and develop technological solutions that help them navigate the world better.

Its founder is a computer engineer from Indian Institute of Technology, BHU, and management graduate from Indian Institute of Management, Bangalore.

Products

Louie Voice Control – Control apps hands free

An Android app which lets you control your phone apps, just by voice commands. The application is available on Google App store. It is still in a development phase and therefore is available as an early [access deal](#).

By just giving voice commands to Louie, you can:

- Voice search on the web & get Louie to read out all the webpages
- Search/Play your favorite videos & music
- Get Louie to read out scanned / Regular PDF documents
- Get Louie to describe an image and read out the text on the image
- Turn On/Off Bluetooth/Flash Light/Find your location etc
- Send SMS/Text messages
- Manage Call Logs/Contacts
- Make Phone Calls
- Book a Cab/Taxi
- Send/Play/Share Audio Messages
