

## Inclusive society for Divyang – My dream

### Introduction:

Helen Adam Keller was born on June 27, in Tuscumbia, Alabama in 1882. She was stricken by an illness that left her blind and deaf. Beginning in 1887, Keller's teacher Preme Sulivana helped make tremendous progress with her ability to communicate and keler won't on to college, graduating in 1904. She overcome the adversity of being blind and deaf to become one of 20<sup>th</sup> century's leading humanitarians as well as co founder of AGOLU.

*"Helen Keller Teaching Divyang Jan for inclusive growth"*

"Optimism is the faith that leads document, nothing can be done without hope and confidence"- **Helen Keller**

That means Hellen is always doing all work with hope and confidence in his life. Our dream is inclusive society for Divyang is only achieve with hope of enhancement with confidence. So inclusive means all together at equal line and society means environment where human being live together with different diversity of human. An inclusive society is a society that over ride differences of race, gender, class, generation, and geography and ensure inclusion, equality of opportunity as well as capability of all member of the society to determines on agreed set of social inclusion that govern social interaction. Expert group meeting on promoting social integration Held on July 2008.

In our society there are many type of human being. In this human being some people are very affluent to do watching, playing, writing, listening but apart from this people are not able to do anything without help of affluent people. But they have ability to do all work without help.

India having huge diversify people and the environment. In this environmental society there many kind of people in this some people are differently able or person with disability. And they are very weak and not treated as part of our society. They are thrown from their house. There many reason behind it likes barrier of education, communication, behavior, Physical etc. but apart from this barrier we saw dream that "inclusive society for Divyang means we are constricting that type of society where all diffretaly-abled people are equal like other people. In this dream we saw that we walk together to achieve society which is inclusive for Divyang.

Let take a step forward to inclusion of Divyang Jan into everyday activities involves practices and policies designed to identify and remove barrier such as physical, communicational, attitudinal, cultural, social, political and skilled education etc. that hamper individual's ability to have full participation in society. So let we go to remove barrier and build inclusive society for, by and with Divyang Jan.

*“Arunima Sinha – First differently abled female to climb Mount Everest”*

In India there is huge diversity between people are found. We are on path of making society which is inclusive for all class of people. In this way we are in process to build inclusive society for person with disability and Indian Prime Minister is on way. He is much concerned about goal (dream) of inclusive society for Divyang Jan. He take much more inclusive ward on the place of person with disability is use as Divyang that means different work. It helps into change mindset people toward the differently able people. Government of India is very much concerned about the inclusion of differently-able person and make a barrier free environment for Divyang. In this way many initiative taken by the government and other institution.

Indian constitution is very much concerned about to empowerment of differently able people. It made many special rights to specially challenged people. It gives many person regarding Divyang. The RPWD act 1995 and amended act RPWD act 2016.

Our education system is also work efficient toward Divyang inclusion. It provide many quality of education to Divyang people government also open many special school for Divyang people likes NIVH,BRA and Bal Sadan these are very special for visually Divyang people and many government local school are also make very efficient role to provide education to Divyang people . They are arranging infrastructure for these people and other s but government also make special teacher who understand the Divyang people.

**In figure 3.15 status of school attendance of disabled children 5-19 years by residence in india in percentage shown.**

**Source- Disabled persons in India, a statistical profile 2016.**

In this field government provides special B.Ed education for Divyang student and many NGO are also work toward inclusive education to Divyang Jan like NFB etc and many MGO provide hostel.

To provide accommodation to Divyang Jan likes UJALA,BRA SEWA KUTIR etc are institution Many supporting NGO and government institutions are working to provide inclusive education to 'Divyang Jan' and also guide them like NAB (national association for blind) eye way etc. in present time the government launches many program to skill to Divyang Jan like skill India mission, 'Jan Dhan Yojana' for financial inclusion to Divyang Jan etc. so we say that our education system is on the way of inclusive society for Divyang Jan.

In present many sports person win many medals in Asian games. Government and institution also working in the field of Divyang sports organize many sports event for Divyang Jan.

Many Divyng sports person come forward and play games and also win medals for India, we know about India's Blind Cricket teams, they win world cup for India many times and Divyang Athletic player also win many medals at international events

Many government institution and NGO organize many event at different level and various sports, institution like Paralympics committee of India, National Federation of Blind and many colleges also organize meet for Divyang people like University of Delhi organize athletic meet for Divyang Jan through EOC (Equal opportunity Cell of Delhi university) and government provide more accommodation to Divyang Jan free entry in stadium and free coach/trainer services, this type of activities promote Divyang Jan to come forward and prove themselves.

We know that if we have money then we survive well for this purpose we need job and government also doing this work to create job and opportunities to Divyang Jan and take many initiative like enhance the reservation in government job 3 to 4 percent and open many special employment for Diyang Jan at different state and central level also. Many program like startup, standup, made in India and many entrepreneur development program run by government to enhance the Divyang Jan skill. In this way, many banking institution NHFDC and many state channelizing agencies are providing fund to Divyang Jan for their new startups, maximum funding 25 lacs with less amount of interest. This initiative are promoting to Divyang inclusion and create opportunities for Divyang .

Government is also working on the mobility of Divyang people in our society. They work on road infrastructure like making sign path on road for visually impaired Divyang and sloping path for Divyang wheel chair, apart from the government make separate toilet for Divyang in swatch Bharat mission and also create the transportation facility in train, bus etc. and provide the travelling concession to Divyang. So we can say that Indian government is working towards the inclusive society for Divyang, they makes plans and policies for the inclusion of Divyang Jan but, implementation and management of plan and

policy is very elastic and it not reaches at lower level of society where high ratio of Divyang Jan is. And its impact that Divyang life become burden on its life because they are forced to beg and they are not getting jobs since there are lack of job opportunity and they becomes burden on their family. And in some case family discard Divyang Jan. in

India there are different states and all having different policy/rules regarding Divyang and they are also discriminate at state level policy like pension policy of different state. Lack of infrastructure

development like road transportation, separate toilet, school and lack of developed equipment, lack of side stick, blind stick and other necessary which are required for the help of Divyang and IT facility also not much available at the hands of Divyang which is more necessary for inclusion of Divyang of our society.

But, we know that the burning light never stop in stormy wind so how we stop toward to making of inclusive society for Divyang, we know many challenges in our path to achieve our dream society. So our government band our society are on path our dream society. They are facing many challenges but they are analyzing their SWOT and walk towards our dream society.

***“Arise! Awake! and stop not until the goal is reached” - Swami Vivekananda***

Government takes many initiatives like accessible India, skill India and Jan Dhan Yojana etc. “Conference on Jun 19, 2018 Indian-American underlines need for accessible, inclusive society for people with disabilities at UN focuses on the inspiring everyone in the society for their individual social responsibility towards the specially able and this sensitization, mass awareness and collective actions by leaders and volunteers has yielded huge social impact over the last four years.” Indian government make separate ministry for Divyang Jan and many council and institution under the ministry of social justice empowerment to person with disability. And the objective to make skill development of Divyang as per industrial needs which make themselves to become gainful employment and contribute to India’s growing economy. One among the recent is the collaboration with Glasgow Kelvin College, Scotland under UK-India Education and Research institute (UKIERI) to benchmark standard between India and Scotland in the area of Disability. Indian government plans and policies are facing towards to make inclusive society for Divyangs and Indian PM Mr. Narendra Modi always said that “ **Sabka Saath Sabka Vikaas**” and in this way the accessible India Campaign was launched in 2015 for barrier-free access to public skills and in virtual ecosystem. Rights of persons with disabilities Act also mandate the government to frame standards for accessibility in built the environment, transport system, information and communication technologies and in other public services.

**Conclusion:**

India has some 40 to 80 million persons with disability. But low literacy, few jobs and widespread social stigma are making disabled people among the most excluded in India. Children with disability are less likely to be in school, disabled adults are more likely to be unemployed, and families with disabled member are often worse off than average. With better education and more access to jobs, people with disabilities can become an integral part of society.

India has growing disability rights movement and one of the more progressive policy framework in the developing world. But, a lot more needs to be done in implementation and getting the basic right". Newer thinking and better coordination of programs is called for. Preventive health program need to be deepened and all children screened at a young age. People with disability needs to be better integrated into society by overcoming stigma; disabled adults are need to empowered with employable skills; and the private sector needs to be encouraged to employ them.

Its key message of UN-VOSAP (India) that everyone is temporarily-abled' so people should not ignore the needs and rights of the 'Divyang Jan' and instead create accessible and inclusive society. I say that inclusive society for Divyang when children with disabilities learn in the same school as their non-disabled peers with the support necessary for them to be successful there, the society is said to be "inclusive" society for Divyang. At the end I say that the word is less thing is more so we should brake barrier open the door and help to create inclusive society for Divyang in the front of open eye.
