

Inclusive Society for Divyang – My Dream

“Divyang” a very beautiful word to describe people who are **UNIQUE in Physic**. The people who have a super sense but the scenario somewhere in the society is the “non acceptance of these people”. One of the craziest dreams of mine is to see equality. Equality in terms the society which treats “abled and differently abled equally”. Let me describe it.

An Inclusive Society for Divyang will be very amazing. There will be proper infrastructure facility for fulfilling our day to day needs. Divyang won't feel like they are different. Our basic needs are stair case, transport (mainly public transport), education, health, business and technology. So here we will have RAMP in place of stairs so **they** can easily move their wheel chairs, we see many reserved seats in public transport for Divyang so it **will be occupied by Divyang only**, there will be many CEO's who will be uniquely abled, there will be school/colleges/universities which will be inclusive of all, many vaccines which will eradicate few disease which make people handicapped & all the uniquely abled people will be friends of technology.

Parents will easily accept that their child is normal and will send them to normal school. Parents will not pamper/paralyze them but will trust them that my child can do anything. Many Olympics medals will be won by Divyang by proper coaching

and yes of course **Guru won't differentiate their students.** Equal punishments & equal reward for both abled & disabled. Many motivational speakers will be Divyang to give life to the dead thoughts. We abled will change our thoughts and help Divyang to wear the wings of hope and fly in this colourful world despite of their difficulties. Half of the problem will be solved if we are able to make better infrastructure. Easy to access things. Why we make disable feel that they are disable and this leads to obstacle in developing our country.

I will suggest let us do research on Divyang and make such accessible things that Divyang will never feel that this is their bad fate or bad Karma. Let us together spread the happiness around.

Even why disable will feel "Bichara". There are 2 rules they must follow: Number 1, "**Khud ko kissi se kam mat samajna**" and number 2, "**Understand your responsibilities and duties. Make best version of yourself. Don't take world for granted. Its nature is to be kind and mean to everyone.**"

Please don't blame Government for all the problems because if on road it is written, "Do not spit here or do not throw garbage here". Then also we do so it is our responsibility to take care of these basic things. All will have to leave the stereotype attitude towards Divyang and treat them equally so they also can do wonders. They can create a new creation to make India Proud.

Wake up people and let all equally explore the world. Life is very small for negatives and time pass things. There are many things to see and feel the awesomeness. Let's go for inclusive world and work for the betterment. Don't snatch the chance from the kids to become sensitive towards Divyang. Let them play and give them chance to hold each other's hand from childhood. So they will lead a better India. Here develops the positive quality of Helping. Sneak peak in the life of Female Divyang, it's really very hard. Boys won't prefer marrying them but I guarantee they have the most loyal & beautiful hearts. Let us take this step forward so all are treated equally.

I am glad to highlight one of the school named **"Amar Jyoti School"** in New Delhi which is Inclusive School. I can say it is disable friendly school. A big thank you to Mrs.Uma Tulli founder of this school.

The Bhartiya Pragna Chakshu Gurukul, Porbandar. A heartily thank you to the principal Mr. Kamlesh. Here various cultural and sports competitions are being arranged amongst the visionary disabled students of the institute. Even it runs computer and technology centre not only for the blind but for all the physically disabled people.

I want you to take round to the universe of the various unique people and make our first step towards awesome India.

All these have proved that disability is in mind and not in the body. Divyang can do anything and everything.

Even I saw one best personality who gives employability to the disable in Ahmedabad. He is Kamaljeet Singh Brar CEO of Design Mate Company. The company is into making of E-learning Content.

Joginder Singh Saluja “A fitness coach” Someone who thought of an idea for gymnastics. Diable free Gym. A creative Divyang rather I can address Joginder.

We have to create more Sai, more Krihnakant, more Joginder and more Arunima's. Let Gurus be like Sayyed Sallaudin Pasha and CEO's be like Mr. Brar. I want my dream to be fulfilled and yes I have taken first step towards it. The first step will be change in attitude. Visibility is the only problem. So let us make beautiful Inclusive Society as God has given us the only the best things.
